

Visceral Manipulation: Abdomen 2 (VM2)

Pre-Study Material

We leave it up to each prospective student to assume responsibility for advance preparation; we cannot screen students for their level of readiness. You may, however, find yourself frustrated and left behind if you do not study before hand. It is suggested that you read through the *Visceral Manipulation II* text book and look up the terms for the following lists of terms and structures provided. It is also recommended that you begin your study well in advance of the scheduled workshops to allow for unforeseen interruptions and a comfortable learning pace. We want this to be an interesting and intriguing educational experience for all of you.

The following is a list of terms and structures that are important in your preparation for this course. In addition, referencing these terms and structures from good anatomical texts such as the current British Edition of Gray's Anatomy, Clemente's Anatomy and/or Netter's Atlas of Human Anatomy are highly encouraged. These anatomy books are available through The Barral Institute.

1. Kidney
 - Hilum
 - Perirenal Fat
 - Renal Fascia
 - Pararenal Body
 - Renal Membrane
2. Kidney Ptosis
3. Hepatorenal Ligament
